

CONNECT

Connect

Connect™ is Infosat's highly advanced, Enterprise Class satellite broadband solution. It is designed to enable enterprise IT application delivery when performance and bandwidth are required. In a turn key solution, businesses get fast, reliable, cost-effective, broadband IP connections for LAN-to-LAN connectivity no matter where the enterprise is located.

Superior Technology

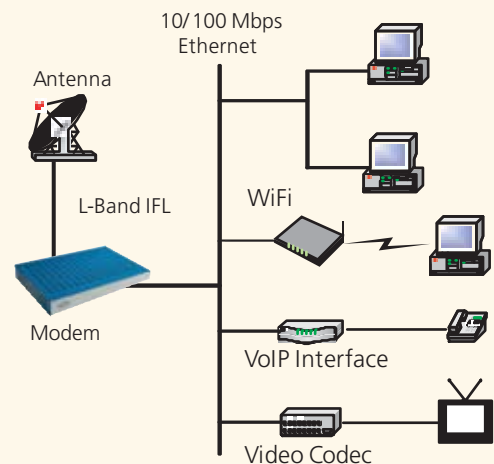

The Connect™ solution integrates all the hardware and software needed to deliver bi-directional broadband connectivity, easily and effectively, while enabling the highest data rates available in the industry today. The solution is scalable for both inbound and outbound data rates, which allows users to easily meet current and future bandwidth requirements.

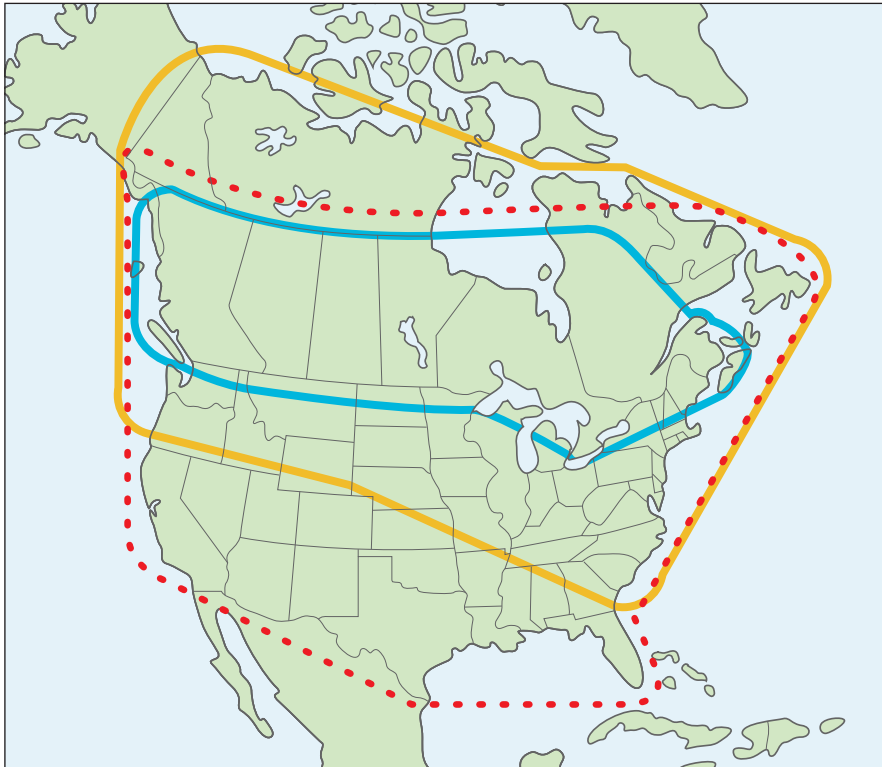

The Real Time Traffic Management (RTTM) features enable mission-critical information to reach the designed destination quickly and efficiently.

RTTM Features

Configurable Quality of Service levels are available to support:

- Corporate Wide Area Network
- Email
- VPN
- Voice over IP
- Large file transfer
- Web research

■ 0.96m 4W Ku Band or 1.2m 2W Ku Band
 ■ 2.4m C Band
 - - - 1.2m 4W Ku Band

Connect™ Service

Service Description	Ku Band & C Band System		
	Connect 2000	Connect 4000	Connect 4000 Plus
Inbound Burst Capability (kbps)	128	128	256
Outbound Burst Capability (kbps)	512	1500	1500

About Us

Infosat Communications, Inc. is one of North America's largest full line satellite telecommunications system integrator and service provider offering a wide range of fixed, mobile and transportable wireless communication systems where satellite facilities are a key component.

Complementing the core satellite group are technology lines including our Security Division specializing in leading edge, IP based CCTV (Closed Circuit Television) security, access control and commercial audiovisual technologies.

As an Infosat client you are backed by one of the world's most recognized family of telecommunications companies including our parent, Telesat Canada.

OUR CORE PRODUCTS & SERVICES INCLUDE:

Satellite Communications

- Data solutions including commercial broadband, high speed internet, hand-held low speed, & packet data
- Voice solutions such as toll quality VoIP and hand-held satellite phones

Security & Audio Visual Systems

- CCTV & access control
- Integrated boardroom multi-media

Complete Rural Communications & Information Networks

- Integrated office IT functionality and VoIP communications extensions to remote branches
- Deployable Disaster Command & Control

If you need to get your people and enterprise connected *simply* anywhere, contact us and explore our cost effective satellite solutions.
